DIVINEFAVOUR EDEH

SOFTWARE ENGINEER

ABOUT ME

A dedicated and efficient full stack developer with three+ years experience in both Frontend and Backend Web technologies.
I have been a blockchain Engineer for almost a year now. My skills include but are not limited to Nodejs, Expressjs, Typescript, Mongodb database, Python, Problem solving, Javascript Reactjs which I use in building fully fledged and scalable server side and client applications.

Seeking to further improve my skills as the future Software Engineer at your company

EXPERIENCE

Lead Software Engineer
Mend
Remote. Lagos, Nigeria
February 2022 - Present

• Developed other junior Software Engineers for these knowledge while using Postman, Swagger and others for API documentations in Reactjs app.

• Liaised with backend developers, frontend developers, quality assurance testers and CTO as needed.

• Worked with other Software Engineers to develop frontend and backend architecture that's well structured and flexible, along with the API to support it.

• Developed fullstack web applications which processed, analyzed and rendered data visually.
